

CARPET

Anti-Static Treatment

INTRODUCTION

Static electricity is often a nuisance. No one likes to receive a jolt when they reach for a door knob or shake a hand. Should a charge of static electricity strike a computer or other piece of today's technology the result can be much more than annoying. A static discharge can damage equipment or valuable destroy data. Static build-up commonly occurs in conditions of low humidity. In a few areas of the country this can be year around. But, in most locations it is only seen during the winter heating season.

Anti-Static treatment will last up to a year in light traffic situations. In heavy traffic situations it will be effective for at least 3 to 4 months. An annual application at the beginning of the heating season is normally sufficient even with heavy traffic. Anti-static can be used on all fibers but it is especially beneficial when used on nylon.

PROCEDURE

- **STEP 1:**
Thoroughly vacuum carpet.
- **STEP 2:**
If carpet is going to be cleaned do so at this point.
- **STEP 3:**
Mix **Anti-Static** with 3 parts water. Apply with a **pump-up sprayer**. Apply at the rate of approximately 250 square feet for each gallon of ready to use solution. (1000 sq. ft. per gallon of concentrate.) This will vary according to the pile height and density of the carpet. After making one pass across the carpet, make a second pass at right angles to the first.
- **STEP 4:**
Use a **Grandi-Groomer** or **carpet rake** to work Anti-static into the carpet.

Chemicals Needed

Anti-Static

Type: Liquid Traffic Lane Prespray

Highlights: Odorless, non-flammable; Great add-on sale especially where computers are present.

Accessories Needed

TWBS Sprayer

Description: Pump sprayer

Purpose: Applies chemical quickly, evenly and efficiently.

Grandi Groom

Description: Grooming tool

Purpose: Aligns and revitalizes fibers after cleaning.

Quick Guide

PROCEDURE

- 1 Vacuum Carpet.
- 2 Clean Carpet.
- 3 Apply diluted Antistatic
4. Brush into carpet.

PRODUCTS NEEDED

- Anti-Static
- TWBS Sprayer
- Grandi-Groomer or Nap Brush
